

FIKRI

Software Engineer | Full-Stack Web Developer

Portfolio: <https://r1fikri.dev> | GitHub: <https://github.com/R1Blmmakan>

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with expertise in modern TypeScript ecosystems, high-throughput backend relays, and reactive frontend architectures. Proven experience in delivering scalable applications, automated circulation platforms, and enterprise property management systems.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, PHP, Dart, HTML5, CSS3

Frontend: React, Next.js, Framer Motion, Tailwind CSS, Alpine.js, Bootstrap

Backend: Node.js, Express, FastAPI, Laravel, NextAuth.js

Database & DevOps: PostgreSQL, Prisma ORM, Docker, Cloudflare Workers/Pages, Git

Mobile: Flutter, Dart, Android

FEATURED PROJECTS

Unified Lossless API (FastAPI, Python, Docker)

- High-throughput lossless audio streaming and caching relay deployed in containerized Docker.
- Features on-the-fly Blowfish CBC stream decryption and HTTP 206 chunked range delivery.

Metland School Library (Next.js, React, Prisma, PostgreSQL)

- Enterprise digital circulation and loan management system for vocational institutions.
- Automated fine calculation algorithms and role-based access control (RBAC).

Pillo Hotel Reservation (Laravel, PHP, Alpine.js, Tailwind CSS)

- Property management system managing room categories, real-time availability, and bookings.

Mirae Web & Mobile Platform (Flutter, JavaScript, Cloudflare Pages)

- Cross-platform platform featuring interactive destination routing and mobile applications.

EDUCATION

SMK Metland - Software Engineering (PPLG)

Focus on Software Development, Web Technologies, Database Architecture, and Agile Workflows.
